With over 100 million monthly active users, there is always something to do in Roblox. But what if you want to call it a day and delete your account? Here's everything you need to know about how to delete a Roblox account or what it takes to deactivate your account. Roblox does not offer a simple service to delete your account. In the Help section, it explains that you can just stop playing, but there are still a few options available if you prefer to have more control: Email Roblox Customer Service: Email Roblox Customer Service on info@roblox.com and make a request to have your account deleted. Call Roblox Customer Support: Prefer to talk to someone on the phone? Call Roblox at 888-858-BLOX and request your account to be deleted. When you email or call Roblox Customer Service, you must provide your email, full name, phone number associated with your account, and address. It's also good to have anything else on hand that identifies you as an account holder. Don't use your account: Avoid using the Roblox account for a year, and Roblox identifies it as an inactive account and deletes it for you. It's a slow decision, but it's guaranteed to work. Don't be tempted to log in at any point during the year, otherwise the timer will reset and you'll have to wait another year. Break the terms: We don't recommend this method, but if you get your account banned three times, your account is eventually deleted by Roblox. It's not a friendly way of doing things, but if all other options fail, it's an option. If you've deleted or abandoned your Roblox account, you probably also want to delete its software. It's as simple as deleting any other piece of software. Windows and Mac have different instructions for non-installation software, but it takes a few seconds to do. Android and iOS users have a slightly different method for not installing apps, but it's just as simple. Roblox: Want to be very careful on Windows? Roblox recommends that you go to C: Users (your Windows username) AppData\Local to remove the Roblox folder. Mac users should go to the documents and delete the Roblox folder there. If you change your mind about a deleted account, there's one option available that can restore your account. Email appeals@roblox.com and explain the situation. Provide as many details about your old account as possible and explain why you want it restored. Hope for the best! There's no guarantee that your data is still available, but it's worth asking in case. By Lindsay Howell Updated September 22, 2017 In Roblox, players can create their own virtual world with the help of The name of the game is a portmanteau of the words robot and blocks. You can collect items and accessories in Roblox, and interact with other players. If you have an item that another player would like to have, you can give that item to that player, and vice versa. Sign in to your Roblox account. Go to the main menu and choose Clothes. Under The Under Avatar, you will see the phrase Give the chosen item (s) to. Enter the username of the person to whom you want to give away your goods or items. Check the item or items you want to send to another player. Click the Send button to give away items. Each month, more than 100 million active users worldwide spend more than 1 billion hours on Roblox, an online gaming platform where users can play games such as Jailbreak and MeepCity, and develop their own. For co-founder and CEO David Baszucki, it's all about allowing content to take center stage. Last year, the company unveiled tools for its 2 million developers, such as a translation feature that allows them to publish games in multiple languages and an update that allows up to 800 people on the server to play simultaneously. The creators, who earned about \$100 million in revenue in 2019 (as of \$70 million a year earlier), are earning on the sale of virtual goods and other game updates. We are tools, says Bachuki. Our developers are real creative geniuses. By Casey Helmick Updated September 22, 2017 ROBLOX accountCollection templates or basic blocks Of the elements you want to use ROBLOX is an online construction game that allows players to build their own levels or locations and create their own unique games and dens. ROBLOX uses basic templates, scripts, and elements that allow players to combine any number of them to create something much bigger and even program their own games. While it may seem complicated, making your own game on ROBLOX is a simple process that can be broken down into a few simple steps. Decide what game you would like to make and what the goal will be. ROBLOX games range from topics and types from medieval war games to obstacle games and disaster games. The first step is to make a good game to determine the theme of the game you will be doing and what a simple goal it will be. Determine how big you want the model to be. A model the size of a room in which you will play. You need to know how many places you want people to see while they are trying to complete your game and change the size of the model in the editor by clicking Edit, Model and Change Numbers to match the size you want. Place the items and bricks around the model to build the map. Tap the bricks on the menu bar to open the toolbar, showing all the items you own and save. Tap and drag the bricks to the appropriate places on the map. Copy and paste any repetitive elements or folded items to avoid having to drag each individual brick onto the model. The scenario of your game. Click on the Model Script in the Workplace list on the right side of the screen. This will shorten your model and bring a text editor with a list of all your if any items in your model have scripts tied to them, the scripts will be listed here. The scripts are in two parts: Cause (or Trigger) and Effect. The first part is that it will cause this trigger to come in in For example, when players step on a certain square, enter a certain word, crash into a certain object, the next part tells the game that you want it to happen. Click the File and then Save both. Bring the name you want to use and click Save. Hey guys in this tutorial, I'll be showing how to look popular in Roblox, but don't worry if you don't have these things that I'm going to go to... be urself... Your amazing as you are... but anyway I just wanted to do a roblox tutorial qit:3 The first step is to move on to Roblox Avatar! XD :)... Easy rightThe second step to choose your own cool looking hair, which you would prefer, but to be popular in Roblox, you have to either choose cinnamon hair, or beloved hair of America, it will look popular on u.The next step is to choose any shirt that is above the waist that most popular girls wear in roblox, as you can see above in my picture, shirts may look something like this, but it shouldn't be like this, obviously your choice. This step is to choose beautiful and cute looking bottoms as short, or any types of skinny jeans that will look adorable on your avatar. The step now to do is choose an accessory hat that all popular people wear in roblox, like a holiday crown, paper hat, buddy baseball cap, mouse ears, and/or Canadian beanieYay now it's a step to get the perfect facial function for your avatar, get either a yaaaawny face, or a nou-it-all-face, or any other person you love and want absolutely. Now is the time to get some facial accessory like this face dust mask, an accessory that is known throughout roblox and reallilly Popular.The last step is to get the appropriate body type, I personally love and think that everyone in Roblox wears 2.0, or just a body block that is basically not having any body packs at all that will keep the body in the shape of blocks.... I'll put Roblokes' body 2.0. There you go, now you're done, now you look like a popular robloxian... Cheers!!!! XDThanks for looking at this tutorial bye. For budding designers and developers, Roblox is a go-to source for scripting tips and design elements. You can create and contribute to games of different genres. If you decide to download the program, you will have the opportunity to play most games for free. It's a popular platform for developing games with potential in the classroom. The Roblox games website lets you download and develop your own games. You can even play the ones that others have created on the platform. The website has a secure chat mode for children, and parents can limit the ability to chat with privacy settings. Unlike competitors such as LEGO Worlds and Blockland, the games found in this program inconsistently. Development by amateur developers can have a big impact on quality. Some gaming environments can also be a bit scary for younger children. The good part is that parents can change multiple filters to make games safer for kids. Easy game creations Laugh all creations in Roblox's Roblox's Ecosystems are represented by the player, you will find games in all genres. From role-playing games with specific goals to life simulators and survival games, you can make up all kinds of environments. While Roblox Studio is for everyone, its features are a favorite for tech-savvy kids. The rookie friendly game engine uses Lua 5.1 language scenarios. There's also a library of models presented by players. Whether you're using the free version or paid, you'll have access to the full Roblox library. The publish feature allows players to promote games to the website. Invite your friends to play the games you've created! While competitors such as LEGO Worlds, Blockland and Unturned are free platforms, Roblox Studio is a freemium product. The creator has complete control and can allow other players to have fun for free or for free 'Robux', the currency Roblox. Robux can be used for updates including game passes, microtransactions, and other items in the catalog. A lot of learning opportunitiesA learning tool, Roblox Studio is perfect for kids and teens. Just like Minecraft! It can be used to learn different skills in design, logical thinking and abilities. However, the introduction of the training module will require a structured and well-planned approach. Roblox Studio offers learning support with detailed tutorials and free lessons. However, there are no student accounts. In this way, children can learn by creating projects and indulging in games developed by others. With Roblox Studio, you can reach a very active and massive community. The company has successfully created an ecosystem that allows players and creators to share experiences, lessons, and ideas. Keep an eye on content from the time who can play and share games at Roblox Studio, students may come across inappropriate content. To avoid such cases, use maturity filters, parental activity accounting, and highly moderated chat. When you view content, you'll see that the ads will pop up from time to time. This is quite unusual for the game engine, and is a deterrent for serious players. But you can't blame the developers for trying to monetize the program, can you? Where can you run this program? While games can be played online, Roblox Studio for game creation is available for download on Mac and Windows operating systems. Is there a better alternative? The game engine, Roblox Studio, has also seen tremendous popularity and success. However, there may be various reasons to look for an alternative. If you don't like minimalist graphics, or you want to try another platform just for fun, here's a list of the most popular options. Lego Worlds:LEGO Worlds is very similar to Roblox. Players create their characters to explore the virtual world. The building system and supports a wide range of LEGO pieces, meaning designs can be as simple or detailed as you want. When it comes to graphics, LEGO Worlds are far ahead Roblox. However, it is not optimized for Full HD, and the images look distorted. Blockland: In terms of background, gameplay and graphics, Blockland feels like a Roblox clone. You can build, mine, play, and use a lot of interesting features. With its all-encompassing modding capabilities, it offers a lot of control and freedom. Compared to the Roblox Studio community, Blockland's troops are rapidly dying out. Over the years, this genre has seen tremendous growth, and competitors are overtaking the game. Unturned: Relatively new to the market, Unturned is open source and developed by amateur gamers. So don't expect the same level of gameplay and graphics as you'll find in Roblox. However, you will still find it an interesting, fun ride. Although the construction mechanics are not neat and the game is not optimized properly, it is updated and evolving rapidly. Like LEGO Worlds and Blockland, this is an alternative to follow. Roblox Studio is an excellent game engine with the player's watch generated content. Like LEGO Worlds, most games are designed in a family setting. While the platform focuses on a younger audience, it is also suitable for adults. The only downside to using Roblox Studio is the ability of children to encounter inappropriate content. Should you download it? Yes, definitely! The best part about Roblox Studio is the endless supply of fun and creative tasks to explore. Simple puzzles. Intricate cities. There is always a design that can be understood and made up.
